

SulfurChrome Introduction

- Chemiluminescence Detector Technology
- Performs Speciated Sulfur Measurement
- Manufactured In & Supported From Calgary, AB
- Backed by 40 Years of Experience in Natural Gas

Rapid Return-On-Investment

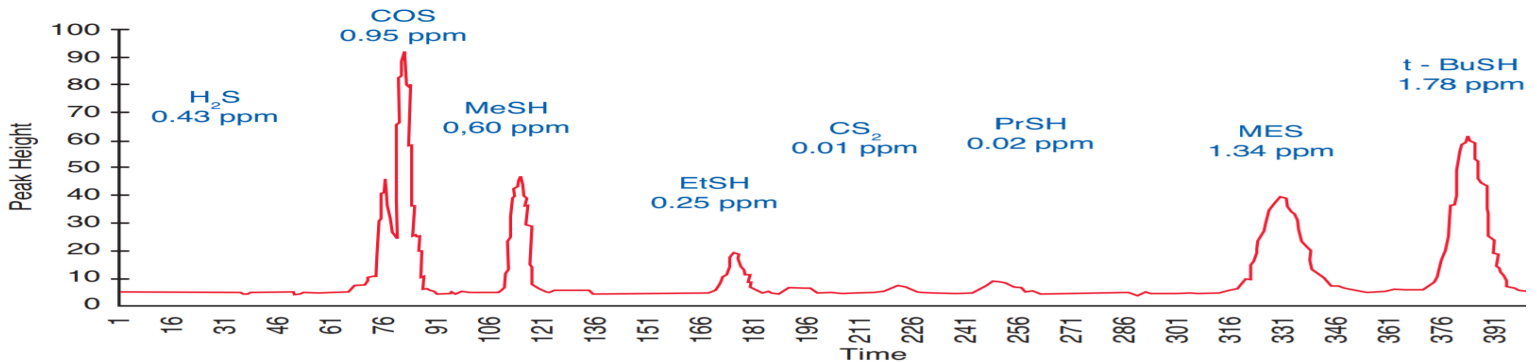

- Optimize Odorization Process
- Guaranteed Contractual Compliance
- Automate Custody Transfer Validation
- Avoid Pipeline "Lock-Out" From Contamination

Measurement Certainty

- Multi-Stream Up to 8 Channels
- Single Cal Gas for All Sulfur Species
- ppb to % Level Equimolar Response
- Performance Not Affected by Hydrocarbon Changes, Process Upsets, or Blending

Speciated Sulfur Analysis
